The Small Print:

- ◆ Price is per parcel (one bag)
- ◆ All stones are cut for best/largest yield. Smaller < 1 ct. will be cut round.
- ◆ Heat Treating can take up to 12 weeks or longer in the winter season.
- ◆ Heat Treating and Faceting can take up to 9 months. See back for more details.
- ◆ All Prices subject to change.

MONTANA FACETING
Recommended for Large High Value
Stones and Custom Cutting for Jewelry

Heat Treating and Montana Faceting

- ◆ Pay for Heat Treating based upon rough weight of the stone.
- ◆ We recommend sending the heat treated stone to one of our highly skilled cutters for evaluation and a suggestion of the best cut to maximize the size and value.
- ◆ Montana Faceting is “Billed when Done” Faceting charges are based upon the finished weight of the cut gemstone.
- ◆ A standard 57 facet round brilliant costs \$99 per carat (\$99 minimum).
- ◆ Fancy cuts cost \$129 per carat (\$129 minimum), plus \$1 per facet.

OVERSEAS CUTTING

OTHER STONES - NOT SAPPHIRE

A Great Choice for Garnets, Amethyst, etc.
Faceting Only ◆ No Heat Treating

Charges based upon finished weight or number of stones - whichever is Greater

One or Two Stones

up to 2.5 carats finished weight

\$30 or \$15 per ct

Additional Stones - Billed When Done
(BWD) based upon finished weight

\$15 each or \$15 per ct

There is no Replacement Guarantee for Overseas Faceting of “Other” Stones
(one of the reasons we don't bill you until the stones are cut)

HEAT TREATING

Improves Color and Clarity

2000 - 5000	\$2,500 / parcel
5000+	\$2,500 / kg
We Can Not Predict or Guarantee the color of Heat Treated Stones Most Improve – Some Do Not	

Heat Treating can take up to 12 weeks or longer in the winter season.

GEMSTONE PROCESSING INFO

Step 1: Heat Treatment – A standard industry practice recommended for most sapphires. Totally natural and permanent, heat treatment usually improves color and clarity. If you like the natural color of your sapphire specify “facet only” for that stone. Note: natural sapphires all react differently to heat treatment. We cannot predict the final color or quality of a heat treated stone.

Step 2: Faceting – A grinding and polishing process (commonly called “cutting”) to create a finished gemstone suitable for jewelry. A cut gemstone is usually one to two millimeters smaller in size and weighs about one-fifth (20%) the weight of the rough stone. The finished gemstone weight will vary from 6% to 35% depending upon the size and shape of the rough stone.

Step 3: The Wait – Heat Treating can take up to 12 weeks. Heat Treating and Faceting can take up to 9 months. (Sometimes longer if we experience problems with the heat treating furnace or delays with Customs or the lapidary). We accept thousands of orders during our short summer season but can only process so many at a time and keep every order separate. We prioritize quality and promise to return the gemstone you found. There simply isn't a faster way to process orders and keep every stone separate.

Step 4: Jewelry – A custom piece of jewelry is significantly more fun and valuable than loose gemstones and is extra special with a gemstone you found. We specialize in building Gold and Silver jewelry with your gemstones.

**THANKS FOR VISITING
GEM MOUNTAIN**

We look forward to returning beautifully cut gemstones to you.

Our Facet Guarantee:

We endeavor to evaluate your rough stones with utmost care. Our goal is to provide you with beautiful finished gemstones. However, rough stones are difficult to evaluate and may contain flaws that are not readily apparent. In the event your ***Gem Mountain Sapphire*** cannot be cut we will provide a substitute gemstone of better quality. Our liability in processing your gemstones is limited to providing a refund for the cost of services. If you elect to leave a stone for cutting that we have identified a flaw within there is No Replacement Guarantee (NRG).
